		<input checked="" type="checkbox"/> Pedagogy	<input type="checkbox"/> Time

What does this do?

The Learning and Teaching in Innovative Learning Environments professional learning courses developed by the New South Wales Government, Australia focus on how educators and schools can develop learning and teaching practices in innovative learning environments. The courses include a face-to-face introductory course (Introduction to Learning and Teaching in Innovative Learning Environments), an online course focusing on effective teaching and learning practices in innovative learning environments (Learning and Teaching in Innovative Learning Environments), and an online course targeted towards educational leadership exploring the challenges and opportunities available when developing, implementing, and leading in, an innovative learning environment (Leading Learning and Teaching in Innovative Learning Environments).

How can it help?

The courses can assist educators to further develop their understanding and knowledge around the teaching and learning practices that are effective when working in innovative learning environments.

An example in practice

A school that needs to increase the capacity and knowledge of their educators around teaching and learning practices that are effective in innovative learning environments can enrol them in these courses. The courses can be used as professional development opportunities for selected, or all, staff working in innovative learning spaces. The courses can also assist educators as they transition into an innovative learning environment.

Where can I find this?¹

Please note that these courses are available only to NSW educators. More information on the courses are available here:
